DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 4, 6, 7, 13-15, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Pangle (US 4,364,142).

Pangle discloses an animal sweat scraper comprising a core 12 made of a resilient material, such as plastic (col.2, lns.23-25), defining an elongated scraper blade 16 and having a scraper surface 20, and a handle 14 extending from one end of said blade area. A sheath 13 made of a second resilient material such as a neoprene elastomer (col.2, lns.51-54), and defining a pair of V-shaped scraper blades 13 on each side of core 12 (Figure 4). Each of said scraper blades 13 comprise a lateral sidewall and a topwall disposed along said scraper surface and meeting along a sharp edge 19 extending away from said scraper surface 20 to define each of said blade edges.

Regarding claims 4, 6, and 7, the first resilient material is a polymer and the second material is an elastomer or rubber, which is softer than the first material.

Regarding claims 13, indentation 18 creates a trough shaped elongated blade.

Regarding claims 14 and 15, sheathe 13 interlocks in groove 16.

Regarding claim 19 the blades created by sheath 13 are considered to be parallel to one another.

Application/Control Number: 10/699,378 Page 3

Art Unit: 3644

Finally regarding claim 20, the blade is substantially consistent width throughout.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 5, and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pangle.

Pangle discloses the claimed device except the specific rubber or plastic is not positively disclosed, Pangle only noted that suitable elastomers and plastics may be used. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use thermoplastic vulcanite, or ethylene propylene diene monomer rubber and a polypropylene, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Response to Arguments

5. Applicant's arguments with respect to the claims above have been considered but are most in view of the new grounds of rejection.

Application/Control Number: 10/699,378

Art Unit: 3644

Conclusion

Page 4

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Susan C. Alimenti whose telephone number is 571-272-6897. The examiner can normally be reached on Monday-Friday, 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 571-272-7045. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
